SIGMA

The self-modular Sigma elements made of special green shockproof resin are particularly suitable for flooring in graphic and mechanical industry as they can absorb to a great extent the vibrations produced by plants, and dampen the relevant noises.
They are also an efficient solution in the galvanic industry thanks to their excellent resistance to acids and corrosive liquids.
They stand pressure loads without yielding up to 680 kN per sq.m.

Colours: Virgin polymer Green

Material: PP Virgin polymer suitable for food contact but without a MOCA certificate.
