

# ALFA MEC CHEST OF DRAWERS

Do you want everything in its place and within reach? It's child's play with the systems for storeroom and office organisation and filing. The basic principle is modularity, so that you can rapidly build your own structures and expand them as the need arises.

This drawer unit is designed to hold small metal products, electronic components or pharmaceutical products. It comprises a broad external casing with hooks at the sides and drawers in six sizes, each with a pocket to hold an identification plate, which can also be used alone.

- Material :                      - polypropylene, inert to acids and solvents.
- Colours:                        - bins and dividers: green; casing and lid: black
- Accessories:                 - tags, dividers, lids and bin stop
