D ₁	233			D ₁	313		
E	190			E	190		
F	114			F	110		

The capacity is valid for filmed charge equally distributed on the pallet surface

A “honeycomb” design for a fare more robust pallet.

The lightweight, resistant MY-A pallets with non-slip surfaces are the latest solution to logistical problems. Easy to use for moving goods, these products are designed for intensive usage, are stackables and rot-free, have a constant unladen weight and excellent electric insulation and are also ideal for use in computerised packaging plants. These pallets never need fumigation, are fully recyclable and damp resistant, which means that they can be stored in the open. Further, they are immune to the aggressive action of acids, fats and solvents and can also be produced in versions with beams, containment edges and for food.

Colour and material: black, red brick, green and blue ind. - RPE and neutral - ATX - PE
