

CONTAINER DELTA MEC 600x400 Logistics

56/IIP - IPPR 935

The container **DELTA MEC 600x400 Logistics**, is expressly designed for the automatic installations.

HEAVY-DUTY: It can easily take up to 50 Kg goods keeping unreformed the bottom, that can be solid or reinforced. Specifically, with an uniformed distributed load of 50 Kg and a temperature of 35 °C, the maximum deflection measured from the horizontal shelf plane is less than 3 mm and 5 mm for the reinforced and solid base version respectively.

INTELLIGENT: It can take RFID microchip and can be supplied complete with a proper lid. Kanban type tag and bar code label can be put on purposely foreseen areas on two orthogonal sides.

HANDY: It is fitted with automatic stacking/unstacking grips and centring dead holes. The ergonomic handles easy the manual movements.

Materials: PP and RPP shockproof containers immune to chemical agents, available in non-toxic materials for foodstuffs or in conductive material for electronic components.

Colours: containers are gray ATX, gray IND or blue DET, lids are black
