

CONTAINERS DELTA MEC 70 and 80

Special Measures

56/IIP - IPPR 936

The **Delta Mec 70 and 80 Special Measures** containers are specifically functional for foodstuff storage and transport. They are injection molded in non-toxic material for food. The walls and the base are perforated, the handles are open, and the structure, with vertical walls, maximizes the internal volume. Stackable 4 to 4 on a pallet 1000x1200 mm, they are particularly used in automated systems for storage and transport in cold cuts and cheese factories, and generally in the food sector.

Material: PP inert to acids, hydrocarbons, alkalis and solvents.

Made of non-toxic material for food or recycled

Colours: gray ATX, gray IND or blue DET
